Contents Volume 141

1 Some thoughts on the development of integer programming during my research career – lecture delivered upon receiving the EURO Gold Medal, July 9, 2001, Rotterdam
E. Balas

8 Deterministic versus stochastic sensitivity analysis in investment problems: An environmental case study
W.J.H. Van Groenendaal and J.P.C. Kleijnen

21 A variable returns to scale data envelopment analysis model for the joint determination of efficiencies with an example of the UK health service
P.F. Tsai and C.M. Molinero

39 Optimal pricing for service facilities with self-optimizing customers
T.A. Grossman Jr. and M.L. Brandeau

58 Optimal dynamic law enforcement
G. Feichtinger, W. Grienauer and G. Tragler

70 Applying environmental criteria to supplier assessment: A study in the application of the Analytical Hierarchy Process
R. Handfield, S.V. Walton, R. Sroufe and S.A. Melnyk

88 Timing and quality decisions for entrepreneurial product development
M.J. Armstrong and M. Lévesque

107 Stochastically dominating shifts and the competitive firm
T. Paulsson and R. Sproule

113 Optimal and near-optimal inventory control policies for a make-to-order inventory–production system
Q.-M. He, E.M. Jewkes and J. Buzacott

133 A search heuristic for the sequence-dependent economic lot scheduling problem
B.J. Wagner and D.J. Davis

147 Path critical index and activity critical index in PERT networks
S.M.T. Fatemi Ghomi and E. Teimouri

153 Product balancing under conditions of quality inflation, cost pressures and growth strategies
J. Vörös

167 A decentralized two-level transportation problem in a housing material manufacturer: Interactive fuzzy programming approach
M. Sakawa, I. Nishizaki and Y. Uemura

186 Maximizing political efficiency via electoral cycles: An optimal control model
A. Gavious and S. Mizrahi

200 On the use of information criteria in analytic hierarchy process
I. Basak

217 Defending against strategic manipulation in uninorm-based multi-agent decision making
R.R. Yager

233 Fractional programming with absolute-value functions
S.S. Chadha
239 Editorial: Cutting and Packing
P.Y. Wang and G. Wäscher
241 Two-dimensional packing problems: A survey
A. Lodi, S. Martello and M. Monaci
253 LP models for bin packing and cutting stock problems
J.M. Valério de Carvalho
274 A cutting plane algorithm for the one-dimensional cutting stock problem with multiple stock lengths
G. Belov and G. Scheithauer
295 Decomposition approaches for solving the integer one-dimensional cutting stock problem with different types of standard lengths
O. Holthaus
313 Modeling multistage cutting stock problems
E.J. Zak
328 A solution procedure for a pattern sequencing problem as part of a one-dimensional cutting stock problem in the steel industry
M. Armbruster
341 An effective quasi-human based heuristic for solving the rectangle packing problem
Y.-L. Wu, W. Huang, S.-c. Lau, C.K. Wong and G.H. Young
359 A 2-exchange heuristic for nesting problems
A.M. Gomes and J.F. Oliveira
371 An algorithm for polygon placement using a bottom-left strategy
K.A. Dowsland, S. Vaid and W.B. Dowsland
382 Heuristics for the container loading problem
D. Pisinger
393 Solving container loading problems by block arrangement
M. Eley
410 Heuristic algorithms for the three-dimensional bin packing problem
A. Lodi, S. Martello and D. Vigo
421 An n-tet graph approach for non-guillotine packings of n-dimensional boxes into an n-container
L. Lins, S. Lins and R. Morabito
440 An improved algorithm for the packing of unequal circles within a larger containing circle
H. Wang, W. Huang, Q. Zhang and D. Xu
454 Pseudo-criteria versus linear utility function in stochastic multi-criteria acceptability analysis
R. Lahdelma and P. Salminen
471 Multiobjective symmetric duality involving cones
S.K. Suneja, S. Aggarwal and S. Davar
481 Solving large-scale maximum expected covering location problems by genetic algorithms: A comparative study
H. Aytug and C. Saydam
496 Obnoxious-facility location and data-envelopment analysis: A combined distance-based formulation
P. Thomas, Y. Chan, L. Lehmkuhl and W. Nixon
517 A cutting plane algorithm for the unrelated parallel machine scheduling problem
E. Mokotoff and P. Chrétienne
528 Strategic commitment versus postponement in a two-tier supply chain
V. Cvsa and S.M. Gilbert

546 A multi-phase mathematical programming approach for effective supply chain design
S. Talluri and R.C. Baker
561 Efficient heuristics for flowshop sequencing with the objectives of makespan and flowtime minimisation
J.M. Framinan, R. Leisten and R. Ruiz-Usano
572 The costs and benefits of commonality in assemble-to-order systems with a (Q,r)-policy for component replenishment
M.S. Hillier
589 Calculating can-order policies for the joint replenishment problem by the compensation approach
Ph. Melchiors
598 Evaluating correct classification probability for weighted voting classifiers with plurality voting
G. Levitin
610 Constructing a quasi-concave quadratic objective function from interviewing a decision maker
A.S. Tangian
643 Economic and financial prediction using rough sets model
F.E.H. Tay and L. Shen
662 A data-driven software tool for enabling cooperative information sharing among police departments
M. Redmond and A. Baveja
681 Using formal MS/OR modeling to support disaster recovery planning
K.-M. Bryson, H. Millar, A. Joseph and A. Mobolurin
691 Optimal maintenance policy in a multistate deteriorating standby system
C.-C. Hsieh and K.-C. Chiu
